

SPECIALTY STONES

ALUMINUM OXIDE

TH

Made from premium aluminum oxide, then specially treated to provide a load resistant, smooth cutting action. The special formulation of the "TH" allows it to hold its shape and makes it an excellent choice for EDM surfaces. Performs well on all types of tool steels.

AO

AO is a perfect all around aluminum oxide stone with excellent breakdown characteristics yet, it retains its shape well, especially when polishing mold cavity details. The AO is filled with a lubricant during the manufacturing process so it does not require pre-lubrication although the use of a lubricant is recommended.

900-F

This stone has a super-fine structure and excellent breakdown properties for final finishing prior to diamond polish finishing. 900-F works especially well on P-20 mold steel ranging in hardness from 29-32Hrc. Primarily used for hand finishing operations and lubricant should be used.
